JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

yellow fever with 36 deaths. Thirty-two of the cases were among whites and 54 among negroes. Of the fatal cases 15 were among whites and 21 among negroes. The last case in St. Michael Parish, which includes the port of Bridgetown, occurred April 8. Previous to the present outbreak the island has been entirely free from yellow fever since 1881.

No case has occurred among the visitors to the island or among foreign seamen in the port, the disease having been confined entirely to the native-born Barbadians.

Rigorous measures are still enforced in St. Joseph Parish, to which locality yellow fever has been practically restricted for the past two months.

BRITISH HONDURAS.
